にあった製品をリーズナブルな価格でご提供します！

■取扱製品

◆ 各種切削工具（PCD/CBN・超硬・サーメット・ハイス）

インサートチップ

エンドミル

ドリル

リーマー

バイト

タップ

刃先交換式刃物

特殊刃物

* コーティングは各種ご要求に対応可能

◆ 単石ダイヤモンドドレッサー

◆ 各種チップソー/メタルソー

◆ 各種ツーリング

◆ 各種切削加工部品

◆ 中国現地への加工技術サポート

◆ 中国加工メーカーのご紹介

■ 主要取扱メーカー（切削工具）

北京沃尔德金刚石工具股份有限公司

深圳市永翔精密工具有限公司

2016年に設立されました本社は深圳にあり、研究開発および生産拠点は河南信陽に設立されています。PCDやPCBNを使用した工具等を提供しています。特に最小加工可能な内径が0.8mmで、国際的にも高い評価を受けています。

PCD, PCBN end mill

PCD, PCBN threading tools

PCD, PCBN slot knife

milling inserts

PCBN CNC blades

河南中原内配集团鼎锐科技有限公司

2015年に設立されました。河南省焦作市にあり、主にPCDやPCBNインサートを提供しています。技術開発には優れた検査および試験装置が利用されており、お客様の生産効率の向上と工具消費コストの削減を支援し、製造加工技術の総合ソリューションプロバイダーとしての地位を確立しています。

PCBN/PCD tools

Clad welding tools

Through-welding tools

Solid crystalline tools

Parting knives

Coated knives

Chipbreaker tools

WSS 威士精密工具(上海)有限公司

ドイツ発祥の中国企業です。PCD、CBN、ND、MCD、超硬工具、工具付属品を供給しています。カスタマイズされた金属切削工具ソリューションにより、お客様の生産性を向上させます。製品は自動車、航空宇宙、建設機械、石油、風力発電、電子機器、太陽光発電、医療分野で広く使用されています。

PCD blades/standard blades

CCGW080202 - PCD blades

PCD standard inserts are suitable for a variety of tools such as turning cutters and can be used to cut non-ferrous metals.

CCGW080204 - PCD blades

PCD standard inserts are suitable for a variety of tools such as turning tools and can be used to cut non-ferrous metals.

CCGW09T304 - PCD blades

PCD standard inserts are suitable for a variety of tools such as turning cutters and can be used to cut non-ferrous metals.

CCGW06T308 - PCD blades

PCD standard inserts are suitable for turning cutters and other tools, and can be used to cut non-ferrous metals.

CCGW120404 - PCD blades

PCD standard inserts are suitable for a variety of tools such as reamers, and can be used to cut non-ferrous metals.

CCGW120406 - PCD blades

PCD standard inserts are suitable for a variety of tools such as hole cutters, and can be used to cut non-ferrous metals.

CCGW060202R-GS - PCD blades

PCD standard inserts are suitable for a wide range of tools such as face milling cutters and can be used to cut non-ferrous metals.

CCGW060204R-GS - PCD blades

PCD standard inserts are suitable for a variety of tools such as drills, and can be used to cut non-ferrous metals.

CCGW09T304R-GS - PCD blades

PCD standard inserts are suitable for a variety of tools such as T-cutters and can be used to cut non-ferrous metals.

CCGW09T308R-GS - PCD blades

PCD standard inserts are suitable for a variety of tools such as thread knives and can be used to cut non-ferrous metals.

CCGW120404R-GS - PCD blades

PCD standard inserts are suitable for a variety of tools such as cylindrical milling cutters and can be used to cut non-ferrous metals.

CCGW120406R-GS - PCD blades

PCD standard inserts are suitable for a variety of tools such as end mills and can be used to cut non-ferrous metals.

CBN blades/standard blades

CCGW080202 Single Edge - CBN Blade

CBN standard inserts are suitable for a wide range of tools such as turning cutters, and the tools made from them can withstand extremely high cutting forces.

CCGW080204 single edged - CBN blades

CBN standard inserts are suitable for a wide range of tools such as turning tools, and the tools made from them can withstand extremely high cutting forces.

CCGW060208 Single Edge - CBN Blade

CBN standard inserts are suitable for a wide range of tools such as turning cutters, and the tools made from them can withstand extremely high cutting forces.

CCGW09T302 single edged - CBN blades

CBN standard inserts are suitable for a wide range of tools such as turning cutters, and the tools made from them can withstand extremely high cutting forces.

CCGW09T304 Single Edged - CBN Blade

CBN standard inserts are suitable for a wide range of tools such as reamers, and the tools made from them can withstand extremely high cutting forces.

CCGW09T308 Single Edged - CBN Blade

CBN standard inserts are suitable for a wide range of tools such as hole cutters, and the tools made from them can withstand extremely high cutting forces.

CCGW120402 single edged - CBN blades

CBN standard inserts are suitable for a wide range of tools such as face milling cutters, and the tools made from them can withstand extremely high cutting forces.

CCGW120404 single edged - CBN blades

CBN standard inserts are suitable for a wide range of tools such as drills, and the tools made from them can withstand extremely high cutting forces.

CCGW120406 Single Edged - CBN Blade

CBN standard inserts are suitable for a wide range of tools such as turning cutters, and the tools made from them can withstand extremely high cutting forces.

Slotting cutter for piston ring groove machining

It can be used for coarse-cut ring grooves and fine-cut ring groove tools with ultra-thin size

威士精密工具(上海)有限公司

ND, MCD/MKD tools

ND/MCD single crystal diamond tools

Natural/artificial single crystal diamond is selected as the raw material, and the natural diamond material is welded to the cutter body by vacuum welding

ND/MCD single crystal diamond tools

Natural/artificial single crystal diamond is selected as the raw material, and the natural diamond material is welded to the cutter body by vacuum welding

ND/MCD single crystal diamond tools

Natural/artificial single crystal diamond is selected as the raw material, and the natural diamond material is welded to the cutter body by vacuum welding

ND Natural Diamond Cutter-Grinding Wheel Dresser

Natural/artificial single crystal diamond is selected as the raw material, and the natural diamond material is welded to the cutter body by vacuum welding

ND/MCD single crystal turning tool

Natural/artificial single crystal diamond is selected as the raw material, and the natural diamond material is welded to the cutter body by vacuum welding

威士精密工具(上海)有限公司

Forming tools/tool customization

PCD Forming Knife - Tool customization

Imported polycrystalline diamond (PCD) is selected as raw material to ensure the processing quality and improve the production efficiency

Chipbreaker tools

Chipbreaker tools

The Weishi chipbreaker cutter is machined into a three-dimensional shape on the rake surface of the tool by laser carving, so that the chip breaking is smoothly removed during the cutting process, and the volume of the chip is controlled.
